- 25X1 1. It is reported that Jakob Boulanger, Vice-President of the Central Administration for Industry, asked SMA Karlsruhe for a ruling on whether Soviet firms in the Soviet Zone come under the supervision of German offices.
- 25X1 SMA replied that such sovietized plants would continue to be included in the planning done by the Central Administration and the Provincial Administration.

25X1 Comment: The planning work of the Central Administrations and other German offices consists of preparing statistics on production possibilities, and use of production by quarters. No German office has any power to decide the amount of production or how it is to be used. The Soviet firms make no reports to German authorities and it is, therefore, not clear how they can ever be included in planning.
